Which Backpack Should I Buy?

我該買哪個背包？

Subject: Help! Which backpack should I buy? Hi Jenny, I need your help. My old backpack is too small for senior high school, so Mom gave me 1,200 dollars for a new one. I went to three shops yesterday, but I could not choose. Can you give me some advice?

The first backpack is large and has a wide pocket for a laptop. But it is heavy. Its weight is almost two kilograms before I put anything in it! The second one is a medium size and very light. It has a narrow pocket for a water bottle and a small round pocket for my keys. However, it is a little short, so my long ruler will not fit. The third one is tiny but cute. It is only the size of a loaf of bread.

I think the second one is the best. I walk a long distance to school every day, so a light bag is important. I can keep my ruler in a package at school. What do you think? Please write back soon! Love, Amy
